Dear Michael,

At the beginning I would like to say thank you for your letter which I received last week. I am really impressed by your outstanding scientific position and professional achievements.

It is a great pleasure for me to have an opportunity to help you in collecting all the needed materials connected with your family. I ensure you that I have started collecting relevant documents in historical archives in Cracow and Wadowice. I have been trying to find contacts with representatives of Jewish Community in Cracow and Bielsko-Biala. You can be sure that I will present you all the result as soon as possible.

I am going also to take an attempt to identify the place in Klecza Dolna where your Grandfather used to have the house.

Considering all the specific questions you have mentioned in the letter I promise to give you the answers in the next mail (I have sent you a leaflet about Cracow University of Economics by the post).

I hope we would have some more opportunities to stay in touch.

In order to learn more about each other I present you some personal information.

I am close to complete my master degree at the CUE, the faculty Management and Marketing with two specializations accounting and functioning and development of enterprises. Throughout the whole the time of my education I have achieved very good results. The previous academic year 1997/1998 I completed with distinction. Moreover during the traineeship as an assistant in BPH (one of the biggest Polish bank) I obtained experience in financial management, accounting and general administration. I am particularly interested in the field of financial management. I also explore methods of assets management on the international capital markets (portfolio analysis and arbitrage). All these aspects are strongly connected with risk management and econometrics forecasting. I have enclosed my research project for my master thesis that I presented in the competition organized in order to get the scholarship in Oxford University. In spite of being very positively evaluated I wasn't able to get this scholarship.

I have not decided about my future plans yet but I might start working at the university as the scientist. It would be great pleasure for me to have an opportunity to explore examples of your scientist works. I also hope that our contact will make the unique opportunity to extend my theoretical knowledge. And that we can become friends.

I look forward to hearing from you again!

Regards,

(-) Artur
